

AMRO ALKABEER

INDUSTRIAL & SUPPLY CHAIN ENGINEERING SPECIALIST

PROFESSIONAL SUMMARY

Resourceful Industrial Engineer and Master's candidate with expertise in supply chain logistics, multi-criteria spatial optimization, and data-driven decision-making frameworks. Recognized for applying analytical methodologies to optimize distribution networks, solve complex logistics challenges, and enhance operational efficiency. Proven ability to integrate technical industrial engineering principles with strategic management to deliver scalable supply chain solutions.

EDUCATION

High School Diploma

Graduated 2019

Thamer International School — Jeddah, Saudi Arabia

Bachelor of Science in Industrial Engineering

2020 – 2024

Faculty of Engineering, Istanbul Aydın University — Istanbul, Turkey

Master's Degree in Industrial Engineering

2024 – Ongoing

Graduate Institute, Industrial Engineering Department, Istanbul Aydın University — Istanbul, Turkey

WORK EXPERIENCE & STRATEGY

Customer Experience & Operations Strategist Intern

Dec 2023 – Jan 2024

Unizone International — Istanbul, Turkey

- Formulated and deployed a comprehensive operational framework to streamline service delivery and client engagement channels across international student networks.
- Leveraged Canva and Microsoft PowerPoint to design visual marketing assets, presentation slide decks, and digital content workflows.
- Collaborated with cross-functional teams to optimize workflow logistics, expanding market reach and operational efficiency.
- Analyzed feedback loops to identify supply and communication bottlenecks, enhancing service turnaround time and satisfaction metrics.

SUPPLY CHAIN & ACADEMIC RESEARCH

Multi-Criteria Spatial Optimization & Supply Chain Analysis

2024 – 2026

- Engineered decision-support models using **TOPSIS** and **Shannon Entropy** frameworks to solve spatial facility location and charging infrastructure placement across high-density urban zones.
- Utilized advanced Microsoft Excel computational modeling for data aggregation, matrix transformations, and multi-criteria weighted scoring evaluations.
- Evaluated supply chain network attractiveness, traffic density data, and spatial accessibility parameters for site selection optimization.
- Published peer-reviewed research contributions at international engineering conferences (INFUS).

KEY ENGINEERING PROJECTS

Urban Station Placement & Traffic Density Optimization

Istanbul, Turkey

- Modeled station attractiveness and localized traffic flows across populated districts using PlugShare spatial mapping and open data portals.
- Applied multi-criteria evaluation matrices to rank candidate site locations for optimal operational coverage and minimum transit delay.

CONTACT

Phone: (+966) 50 719 4788

Email: Amroalkabeer2000@gmail.com

Location: Jeddah, Saudi Arabia

CORE SKILLS

- Supply Chain Logistics & Distribution
- Process & Spatial Optimization
- Decision Making & TOPSIS Modeling
- Data Analysis & Shannon Entropy
- Quality Control & Systems Engineering
- Inventory & Workflow Management
- Cross-Functional Team Leadership
- Customer Experience & Client Strategy
- Continuous Process Improvement

TECHNICAL TOOLS

- Microsoft Excel (Data Modeling & Analysis)
- Microsoft PowerPoint (Presentations)
- Microsoft Word (Documentation)
- Canva (Design & Visual Assets)

KEY COMPETENCIES

- Strategic Resource Planning
- Quantitative Research & Analysis
- Root Cause & Bottleneck Analysis
- Operational Cost Reduction

LANGUAGES

English: Professional / Fluent

Arabic: Native / Fluent

Turkish: Intermediate
